Gamified Assessments

Oct 2023 - Present

Associated with Inderprastha Engineering College

Develop a platform which will help students practice and enhance their skill regarding gamification of assessments. Nowadays, these examinations are widely regarded by organizations due to these major advantages.

1. Problem solving skills are tested to a greater extent.
2. There are hundreds of ways in which the problem can be solved, every student will have a different approach to the situation
3. Unlike MCQ's there isn't a single answer, AI tools are unable to solve these questions , therefore unfair means cannot be used in these assessments.

In this era there are several AI tools that can find the answer of a question in mere seconds, gamified assessments can act as a barrier and help in maintaining the integrity of the exam.

Skills: Front-End Development
